## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reason for allowance.

Claims 1-12 are allowable because applicant presents remark/argument on June 25, 2007 is persuasive.

With regard to claim 1, applicant presents remark/argument on pages 6-9 that improving edge rendering of an object with tag plane associated with scan-line run length. In addition, "Rendering hints are associated with each pixel. The plane of rendering hints, one rendering hint for each pixel is adjusted according to Applicant's method so that the rendering hint plane can be expanded or reduced in the neighborhood of the particular pixel: if the tag plane of one of the objects corresponding to the intersecting runs is to be dilated in the horizontal direction, a new run is inserted at the run transition having the specified number of pixels in length and the tag value of the object to be dilated; and the tag plane of the other object is decreased by removing the specified number of pixels in length from the run adjacent to the interesting run". The remark/argument is persuasive.

Claims 2-12 are dependent claims of claim 1 and claim 2, respectively.

The closest prior arts in the record are Hoel et al (US 4,942,541), Nakagome et al (US 4,115,815) and Ushidal et al (US 5,644,366). Either by Hoel et al, Nakagome et al or Ushidal et al individually, or combined Hoel with Nakagome and Ushidal do not teach or suggest the above claimed limitation. Therefore, claims 1-12 are allowable.
